

# The Motherland of Man is In Ancient Taiwan

Taiwan Paleocivilization Research Center    Host / Ho, Hsien-Jung, July 2008.

## The Lost Ancient Unknown Civilization

### The road-cut, Capital Hill, Smyrna, Asia Minor

Three civilizations, 5,000 feet above sea level, existed before the mountains were raised.

### Niven's Mexican buried cities

Now 7,000 feet above the level of the sea, Mountains of 5,000 feet higher is intervening. Geologically, the lowest city dates was in existence more than 50,000 years ago.

### An iron lance at Kushiro City of Japan was ancient unknown civilization

There was a bar of iron in aqueous rock at the sea precipice of Kushiro City, Hokkaido in July of 1931. The expert investigated, it was the iron lance that a bar of about 1.67 m long originally. The aqueous rock was accumulated in water must take several ten thousand years at least. In other words, if time appraised errorless, this iron lance was ancient unknown civilization that already disappeared.

### An iron lance at Kushiro City of Japan was ancient unknown civilization

There was a bar of iron in aqueous rock at the sea precipice of Kushiro City, Hokkaido in July of 1931. The expert investigated, it was the iron lance that a bar of about 1.67 m long originally. The aqueous rock was accumulated in water must take several ten thousand years at least. In other words, if time appraised errorless, this iron lance was ancient unknown civilization that already disappeared.

## Super Paleocivilization relic – OOPARTS

A lot of ancient relics of the mankind left even use modern science and technology will not to be apt to achieve that kind of achievement, and even modern archaeologist will feel headache, its source that unidentified. These relics are called OOPARTS.

OOPARTS is the abbreviation of "Out Of Place ARTifactS ", it is the meaning of the unearthed ancient artificial object in the place that should not appear. It is divided into two classes.

### OOPARTS of first class

The artificial object, which does not accord with space-time, was dug out from the old stratum, such as the artificial objects in the fossil, the gold lines in the stone, the piton in the stone or the quartz, the metal

container appearing in the rock, the ironware locking in the colliery, etc.; for instances: the Salzburg Cube of Austria, Coso Artifact of America, the Klerksdorp Spheres of South Africa etc..

## The OOPARTS of first class may come from Extraterrestrials

The mankind learns to make usage of tools only in the history of hundreds of thousands years ago, but the artificial objects are found in the ore that formed several ten million or several hundred million years ago, let the modern mankind has no way of explaining its source. The artificial objects may come from the intelligent beings before human being; i.e. maybe Extraterrestrials.

## OOPARTS of second class

After the human civilization began, the ancient super-civilization relics of mankind were found, its artifacts could not make unless based on modern knowledge and technology, but they had the various kinds of craft works that existed in ancient times; For instances, the Acámbaro Figures in Mexico, the Antikythera mechanism in the Mediterranean, the crystal skull of Honduras, the Baghdad battery of Iraq, the stone gears of American, etc.. It showed the mankind on earth had ancient super-civilization to exist, but where this civilization did comes from; it was still a mystery so far.

## The reason why ancient civilization lost

### Science examines the history of human civilization

The war of Troy in ancient Greek poet Homer's epic "Iliad" was about 2900 years ago. Troy City was captured by assault and disappeared about 3200 years ago, but archaeologist excavated out "the battle field of Troy" at a little village near Sparta of Greece in March 2002 that verified the authenticity of Homer's epic.

In recent years, combining geosciences and ancient legends, a new science of the geographic mythology appears that can examine the history of the lost civilization.

### Mythology and legend rumor ancestor came after the cataclysm

Ethnologist points out: In more than 130 races of Indian in America, mostly there are mythologies taking a cataclysm as the theme in all race. According to the expert estimates, the known flood mythology and legend are more than 500 in the entire world. Even aboriginal in mountain area and nomadic people in desert have the legend of global cataclysm that destroy most human, and the cataclysm is all in Northern Hemisphere.

### The reason is mostly the global cataclysm took place

According to legend, the ancient civilization lost mostly that the global cataclysm took place. It was not

the unusual weather that fell ultra torrential rain causing regional flood or local earthquake took place, but only came from “mega-tsunami” , which raised the waves higher than 100 meters in the ocean and destroyed everything on the islands and adjacent shores.

## There are 2 kinds of the occurrence of mega-tsunami

### 1. The asteroid strikes the earth's ocean.

An asteroid struck and still added the Yucatan peninsula open waters earnestly 65 million years ago that caused the mega-tsunami and climatic changed, therefore the dinosaur became extinct. But there was no earth mark indicating the asteroid struck the ocean in near ten thousands year, So, the lost civilization was not destroyed by the asteroid.

### 2. The flank failure of island stratovolcano.

As 4th glacial period finished bringing the large-scale volcano eruptions of island stratovolcano and its flank failure might cause the mega-tsunami.

## End of glacial period causes eruption of huge volcano

### The 4th glacial period of Europe began climatic change till now

The temperature change pursued 80,000 years ago in Europe.

### The fourth glacial period ended 12,000 years ago

The fourth glacial period began 80,000 years ago and culminated nearly 18,000 years ago. At that time, the area of ice sheet covered three times larger than today and piled up the ice sheet several dozen meters thick equally on the global ground. Then the ice began to melt away gradually and dissolved and flowed into the sea. After a cold spell, before lasting until about 12,000 years ago, the climate got warm again and glacial period ended. The sea level rose till now.

From Barbados Island submarine Coral of Acropora palmate rebuilt the history of rising sea level 120 meters for 18,000 years through dating of  $^{14}\text{C}$ .(Source: Fairbanks, 1989)

### Sea level was low 120 meters in 4th glacial period

Some moisture formed the ice and snow, and was intercepted on the land in the 4th glacial period, so, the sea level was lower than now about 120 meters. The Eurasian edge in west Pacific Ocean is a shelf, including the selves of Japan, East China Sea, Taiwan, South Sea, Ryukyu Archicontinent and Sunda Archicontinent, joining together as a piece of continent of the shallow sea land.

4th glacial period map of Asia

## Earth's crust balance was destroyed producing the volcano eruption

When low temperature reached the lowest point, iced lamination deeply and seriously loaded in the earth's crust but remained stable. When getting warm again after a cold spell about 12,000 years ago, the glacier gradually vanished. The stress balance was destroyed and adding the continents shifting that producing the crack in the earth's crust, which initiated the magma rising from the cracks, and triggering the volcano eruption and strong earthquake, and producing the tsunami.

## The formation of volcanoes

Each plate of crust extrudes in the plain of contact and makes the earth's crust break. Then the magma in the high-temperature mantle upwells from the crack, namely the volcano eruption takes place.

## Eruption of huge volcanic island causes Mega-tsunami

### Stratovolcano acts as a series of nature underground reservoirs

The deep of Stratovolcano has two types of rock. One is loose and permeable material, such as rubble and sandstone that the water can soak from the surface down to the laccoliths. The other type of rock is the lava dyke which is formed by volcanic magma. The dyke became hard and impermeable. The water cannot penetrate through this hard rock and is trapped behind it. So, there are many dykes within the Stratovolcano that act as a series of nature underground reservoirs. Its stored moisture can be long from thousands of years to ten thousand years.

### Landslide of island stratovolcano causes the Mega-tsunami

The volcano eruption and accompanying with earthquake causes landslide of island stratovolcano, whose enormous volume of earth submerges into ocean, and evokes the sea water to rise a mega-tsunami. A mega-tsunami will become a cataclysm on all the islands and coastal land, and causes the human calamity and the disappearance of ancient civilization.

### Tsunami causes the human disaster

The storms or the earthquakes evoke the waves, which are too high to usually exceed 15 meters, and wavelength does not exceed 100 meters. When the fault happens in the sea floor causing Tsunami, which attacks the coast, invades the inland and causes the human calamity. For example, Tsunami took place in the open waters of Sumatera at the end of 2004 that caused the death and missing of 295,000 people in South Asia altogether.

## Mega-tsunami causes human century calamities

The wave height of Mega-tsunami is over 100 meters in the deep sea, and wave length can be over one hundred-km-long. The long wave and high water wall can traverse big ocean of thousands of kilometers, and surge into the distant coast. The tall and big water wall can go deep into dozens of kilometers in the inland, and cause crushing destruction. It can make the human century calamities.

## Mega-tsunami has super force of destruction

### A big landslide made a mega-tsunami

A big landslide happened on 8th July 1958 in Lituya Bay of Alaska that made a mega-tsunami to ruin trees to an altitude of 520 m.

### Volcano of Cumbre Vieja on La Palma Island may erupt

In west waters of Africa, volcano of Cumbre Vieja on La Palma Island, belong to Canary Islands, may erupt; according to estimation, 500 km<sup>3</sup> of earth and stone may avalanche, and causes a mega-tsunami, whose wave may have several hundred meters high.

### Volcano of Cumbre Vieja on La Palma

Mega-tsunami can cross the Atlantic Ocean westwards with 720 km/hour of speed, reaches the east bank of U.S.A. in eight hours.

Mega-tsunami reaches the east bank of U.S.A., the wave is 10~25 meters high, and pours into the inland up to 20 km.

## The waters of northeastern Taiwan is the origin area of tsunami

### Taiwan Island and topographic map of nearby waters

### Volcanic area in northeastern Taiwan

There are many volcanoes existing in northeastern Taiwan and its vicinal waters, including the northern Snow Mountains, which is the intersected place between Ryukyu and Luzon volcanic arcs.

### Volcano distribution map near Southern Okinawa Trough

The volcanoes eruption has taken place many times in the northeastern Taiwan and nearby waters. We can

often find a lot of volcano eruption relics “pumice” on the nearby valley or seashore. In there are still full of volcanoes.

## Around Turtle Island is still an active volcanic region

There are 60-70 volcanoes in the seabed and at least 11 are still active and 30-40 nozzles of hot spring around the active Turtle Island.

This is a 4m-diameter, 6m-height nozzle of hot spring, the biggest one in the world. The north segment of Snow Mountains nearby Turtle Island, there is the volcanoes in the past.

## Tsunami is easy to take place in waters of northeastern Taiwan

In 2005, Professor Chao-Shing Lee and professor Yi-Ben Tsai point out that there are really many residues of magma cell still beneath the floor of waters of northeastern Taiwan, and submarine volcano group all locates in the break and the fault of the sea floor, which continue extending and spreading to the northeast corner of Taiwan along the fault-zone and become the origin area of tsunami.

## The records of tsunami at northeast of Taiwan

In about 1850 years, Chengkong of Taitung County was attacked by the tsunami.

December 18, 1867, the heavy earthquake once takes place near Keelung Islet, caused tsunami, the wave was up to eight meters, lead to the great calamity, and take a death of several hundred people.

## **The north segment of Snow Mountains has trace of great landslide**

### The eastern flank of the Snow Mountains looks as it has been cut out by the nature event

In Pei-I Highway at the point of the Ridge of Snow Mountains, we find a sudden drop of about 600 meters and there is no fault in the drop. In order to reach Lanyang Plain, we must negotiate 9 sharp bends and 18 changes of direction. So, we may imagine that the mountain has been cut out by a nature event.

The map of northeastern Taiwan

### The profile shows a landslide

The original eastern slope of Snow Mountains may be symmetric to the western slope. The profile from Taipei City to Toucheng around Pei-I Highway denotes a landslide of eastern slope of Snow Mountains.

## **The northern Snow Mountains conceals natural**

# **underground reservoirs**

## **Tunnel construction of Snow Mountains in No.2 Freeway is difficult**

The tunnel construction of No.2 Freeway, 12.9 km in length, penetrates the northern Snow Mountains. It is the longest tunnel in Southeast Asia. East segment of tunnel, 3.5 km in length, was found very fragile, complex geology with many folds and 6 main faults. In total there were 98 major collapses and 36 large artesian waters during the tunnel construction.

## **The tunnel construction was difficult to treat the artesian water**

The worst problem of the tunnel construction of Snow Mountains was the largest artesian water in the world that yielded water up to a total of 650 liter/sec and accompanied a large number of mudflows and landslides that buried the construction machinery.

## **The artesian water of Snow Mountains is more than 8,000 years old.**

In September of 2004, National Expressway Engineering Bureau took the samples of the artesian water in the tunnel of Snow Mountains, and sent to the University of Taiwan and American Miami University to analyze its isotope data. Through dating the result was as following :

The Isotope Dating Data of Groundwater in Snow Mountain's Tunnel in Pei-I Freeway

## **There are natural underground reservoirs in this mountain**

The data of  $^{14}\text{C}$  isotope dating shows that groundwater in the tunnel of Snow Mountains is more than 8,000 yr BP.  $^3\text{H}$  isotope dating determines a low limit of 1.0 TU that indicates the old groundwater does not combine with new rainfall. It shows that there are "natural underground reservoirs" concealing inside the north segment of Snow Mountains.

## **Tea trees faded the half indicated reservoirs inside Snow Mountains**

After digging the tunnel of Snow Mountains, the water of natural underground reservoirs lost during the drought in 2003, then more than 300 hectares of tea trees at Pinlin just above the tunnel faded the half that never happened. It also indicates there are a series of natural underground reservoirs inside the northern Snow Mountains.

## **The northern Snow Mountains belongs to the stratovolcano**

The northern Snow Mountains is in the volcanic area, several hot springs still exist today in this area, the two most famous are: Jiaoxi Spring on the east side and Wulai Spring on the other side, and there are a series of natural underground reservoirs inside it that indicates it is a kind of stratovolcano, which inclines

to collapse.

## **The outcome of ODP Site 1202 operation proved the high depositing area**

### **The ODP Site 1202 is on the north slope of Ilan Sill**

In April 2001, the Ocean Drilling Program (ODP) Site 1202 operated on the south slope of southern Okinawa Trough, the same position on the northern slope of Ilan Sill. Four holes are cored; the deepest one is 1,275 m under sea level and 410 m below seafloor (mbsf). The drill core of entire 410-m depth takes out from the strata, and makes various kinds of inspection.

JOIDES Resolution Drilling Rig at Keelung Harbor

Topographic map of ODP Site 1202

Map of ODP Site 1202

### **The Southern Okinawa Trough is the place of highest sedimentation rates**

The analysis of 410 mbsf terrigenous sediments in the ODP Site 1202 leaks out the sedimentation rate is the biggest one in the world, about 400~500 cm/k yr. According to the global data of the world, the common condition is 3~5 cm/k yr. The sediments at Site 1202 are deposited from low-grade metamorphic schist and marls, which is found within these mountain ranges on the island of Taiwan.

### **Sediments of Site 1202 doesn't come from Lanyang River**

At Site 1202, the nearest river is Lanyang River, which is a clear stream, low in sand, and limited flow. The sediment of Lanyang River does not exceed 1,500,000 m<sup>3</sup> every year that indicates it cannot drift enormous sediment of sand and stone continuously to southern Okinawa Trough. It has not been clear where does this district sediment comes from?

## **The outcome of ODP Site 1202 proved a big landslide**

### **Volcanic ash reveals nearby volcano eruption**

From the analysis of the drill core of ODP Site 1202, there are a few volcano glass particle samples in it that shows once nearby the eruption of volcanoes in the north segment of Snow Mountains takes place, and little part of the sediment mixes the volcanic ash.

### **The volcanoes eruption of Snow Mountains cause a big landslide**

Once the volcanoes of northern Snow Mountains erupted, the magma upwelled to heat the water of the

natural underground reservoirs, and then raised the water pressure and triggered the collapse, which created a big landslide. The chain effect took place; whole an enormous volume of earth rolled and fell that made the smooth coastline to form the beautiful concave arc.

### 3-D image of northeastern Taiwan

The image from the space shows that there is an indentation of beautiful arched coastline.

### The original coastline of northeast corner of Taiwan was straight

The original coastline of northeast corner of Taiwan was pushed and raised by Eurasia plate and Philippine marine plate. So, it should spread from the coast of Hua-Tung straightly, through the east of Turtle Island, until reaches Santiago, and presents with the precipitous rocky coast.

The map of northeastern Taiwan and its waters

### The original topographic map

Before landslide of Snow Mountains, the original topography of northeastern Taiwan should be the red line (contour line of -1000 m) and Black Current passed between Ryukyu Volcanic Arc and Taiwan Island.

### Landslide spread into the ocean and formed Ilan Shelf and Ilan Sill

When the landslide happened, the enormous volume of earth in eastern flank of Snow Mountains dropped into the Pacific Ocean, and not only filled and led up the seafloor of more than 3,000 meters, but also spread out to form Ilan Shelf, Ilan Sill, and joined the Ryukyu Islands Arc and filled out the southern Okinawa Trough of high over thousands of meters that obstructed the flow of Black Current and compelled the flow to upwell.

The topographic map of north-eastern Taiwan and its waters

## **The big landslide of northern Snow Mountains caused a mega-tsunami**

### The enormous volume of earth dropped into the Pacific Ocean

From the east flank of Snow Mountains to the original coastline of Ilan, the area is about  $800 \text{ km}^2$ . After volcano erupted and collapsed that lowered the average elevation about 600 m; therefore, estimating the volume of earth about  $480 \text{ km}^3$  dropped into the Pacific Ocean.

### Big landslide caused a mega-tsunami

When Volcano of Cumbre Vieja erupts, estimating  $500 \text{ km}^3$  of earth and stone may avalanche, and cause a wave height should be over several 100-meter of mega-tsunami.

The background and environment in the northeast corner of Taiwan is similar to Volcano of Cumbre Vieja. The landslide of Snow Mountains may cause a mega-tsunami. According to the volcano of Cumbre Vieja, its wave may be over several 100-meter high.

## Sediment at Site 1202 comes from the avalanche of Snow Mountains

It is the only answer that the volcanoes of northern Snow Mountains have erupted and triggered the big landslide of east hillside that produced the sediments of earth to ODP Site 1202. This big landslide may cause a mega-tsunami that becomes a worldwide cataclysm and the century calamity of human.

## The evidences of big landslide in geography and geology

### From a viewpoint of geography Lanyang River is a new one

There is very little evidence of thick submarine fans and major slope deformation features, and the seashore line and the contour lines beneath the sea level are very straight and smooth near the Lanyang River mouth that indicates it is a new river.

### Suao Bay was once Lanyang River mouth

There are two nature prominent embankments beside Suao Bay, and all the contour lines bulge out from it at the influence of Black Current northwards, and there are several sand bars outside Suao Bay, including a submarine elliptic sand bar about more than 2.5 km long, indicating that the Lanyang River once has flowed out from Suao Bay since long time ago.

Topographic map of northeastern corner of Taiwan

### Lanyang Plain wasn't formed from alluvium of Lanyang River

Lanyang Plain is a vast triangular plain, about  $800 \text{ km}^2$ , but Lanyang River is only a clear stream, which is 66 km in length, low in sand and limited flow. The depositing amount of Lanyang River is only about 8 million metric tons every year that can not be the sources of earth in Lanyang Plain. How does the vast triangular Lanyang plain cause?

### Geologic consideration: a big landslide happened in Snow Mountains

In Snow Mountains beside the western Lanyang Plain, the stratum is Hsitsun formation and Szeleng sandstone, which is a very hard stone. We can find the stratum break end but no fault in here that

indicates the east side of Snow Mountains has been a big landslide. The big landslide has made the vast triangular Lanyang plain.

## Geologic Map of North-eastern Taiwan

In the red circle, the stratums break end.

## Great change removed mountain and sea in the northeastern Taiwan

The great change of Lanyang River course should come from a big landslide of northern Snow Mountain. The great amount of earth and stone sank into the sea, and then there was no obstrucater to make a turn to Suao Bay. So, it pour into the sea directly, and formed the new Lanyang River course and a new river mouth that proved the fact of big landslide once took place in northern Snow Mountains.

## Picture of Suau Bay from South Bank

This is the river mouth of original Lanyang River.

## The sediment of Site 1202 was formed from the landslide of Snow Mountains

Some geologists think that the Ryukyu Islands Arc expands to the west to touch Taiwan Island. If it is so, the deep sediment of Site 1202 should not be the same as the composition of mountains in Taiwan. The terrain drops eastwards from Lanyang Plain to Ilan Shelf, Ilan Sill, and reaches to the south of Yonaguni Island all the way that shows the sediment at Site 1202 was sup-plied from the landslide of Snow Mountains.

## When did landslide happen?

From the outcomes of analysis terrigenous sediment at ODP Site 1202 express time interval as following:

From the terrigenous sediments the depletion of heavy oxygen isotope began and lasted to	17 kyr ~ 8 kyr
C/N ratio and CaCO <sub>3</sub> content of the bulk sediments in the smaller than 63 micron fraction suggested terrestrial source contributed significantly during the period	25 kyr ~ 11 kyr
A reversal of oxygen isotopic values to more positive values suggested	11.6 kyr ~ 11.1 kyr

The average time is about 12,000 years BP.

## What's the time of ancient civilization being destroyed?

Japan's oldest ancestor was Minatokawajin

Minatokawajin disappeared on Okinawa Island of Ryukyu about 18,000 years ago, and then no cultural relics appeared after 10,000 years.

## Cataclysmic flood happened in all parts in ten thousands years ago

The disappearance of Minatokawajin, the legend was destroyed because of flooding the ancient land of Ryukyu in cataclysm. And a lot of nationalities of all parts surrounded the Pacific Ocean, including Taiwanese aboriginals, it was said their ancestors survived after the cataclysm wreaked havoc.

## Mega-tsunami happened about 12,000 years ago

From the outcomes of analysis terrigenous sediment at Site 1202, the average time is about 12,000 years before present (12 k yr BP). The time interval coincides with the mega-tsunami. When the 4th glacial period ended in 12 k yr BP and the first people in Japan on Okinawa Island was about 18 k yr BP, briefly the mega-tsunami happened about 12,000 years ago.

# The lost continents of earliest civilization in the world

## The 2 earliest civilized continents have already disappeared

In the world, there are 2 earliest civilization lands: Mu and Atlantis. According to the legend both land have lost already about 12,000 years ago.

## The lost first civilized continent in the world — the land of Mu

### The Source of the land of Mu

Churchward found the Naacal Tablets, the interesting symbols and vignettes, in the Indian temple in 1868, and he researched and finally deciphered its meaning after 2 years. Then he searched for tablets, relics and ancient books around the world, and wrote “*The lost continent of Mu*” after 50 years.

### The land of Mu

The British: Col. James Churchward

“The Lost Continent of Mu” was in the Pacific Ocean.

## The Empire of the Sun in the land of Mu

Churchward located the land of Mu

When Churchward traveled the South Ocean Islands for a month, then from the locations of prehistoric megalithic civilization where he found, he drew the map of Mu, which was a lost continent in the middle of Pacific Ocean.

The distribution of prehistoric megalith on the South Sea Islands (Churchward drew)

## The Domain of the land of Mu

The Domain of Mu extended from north of Hawaii, down towards the south. A line between Easter Island and the Fijis formed its southern boundary. It was over 5,000 miles from east to west, and over 3,000 miles from north to south. The continent consisted of three areas of land, divided from each other by narrow channels or seas.

The Geographical Position of Mu

## Churchward's Description of Mu

Long long ago, there was a great civilized Empire of the Sun in the land of Mu on the Pacific Ocean. The Empire ruled the earth, had possession of huge temple and 7 beautiful cities. Their people lived with free and unrestrained under the shiny sun. The civilization of Mu dates back more than 50,000 years ago.

## Society of the Empire of the Sun

La Mu, the Emperor, managed all thing, politics and religion at the Royal Palace of the Capital. The people organized by ten races, and there were 64 million people in all ; and the leading right of culture was had by white race. It was a matriarchal society and religion had only one, worshiped the God of Sun, and worshiped the Creator of Universe—the seven-headed serpent—Narayana.

## The people of the Empire of the Sun emigrated abroad to establish colonies

One Group sailed for east to get to Middle America, and extended to North America and South America to establish the colony of Kara Empire.

One Group sailed for west to get to Burma, and extended to India, Middle Asia and Middle Europe to establish a colony of Great Naga Empire.

One Group sailed for west to get to China, and extended to Mongolia, Eastern Europe and Siberia to establish a colony of Uighur Empire.

The line of colonization from the land of Mu to the entire world

The colonized nation of the Empire of the Sun——The Uighur Empire

## The Destruction of Mu

According to Churchward's description, about 12,000 years ago a great earth-quake struck the whole continent. The land rolled and heaved like the ocean's waves, and trembled and shook like the leaves of a tree in a storm. Temples and palaces came crashing to the ground and monuments and statues were

overturned. The cities became heaps of ruins.

## A volcanic cataclysm

The volcanic outburst burst out a thick pall of black smoke, and huge tidal waves from all sides came rolling in over the land. The land of Mu sank into the ocean and disappeared.

## A cataclysmic flood

Such as completed the destruction of the Maya edifices in Yucatan, after the earthquakes had shaken them to their foundations. The Yucatan Maya —the builders— were virtually wiped out.

After the submersion of Mu

## Churchward confirmed Mu existence from 4 items :

1. In an India temple, Churchward found sacred tablets that suggest having Mu-Land, and he deciphered with the aid of a learned priest.
2. There are convincing proofs of Mu-Land in the old manuscript: Hindu Epic Ramayana, Troano Manuscript, Codex Cortesianus, Lhasa records and cliff writings in western of America.
3. There are existing ruins, and its location and the symbols are decorated, tell of the lost continent of Mu, the motherland of man.
4. There is the universality of certain old symbol and custom as discovered in Egypt, Burma, India, Japan, China, South Sea Islands and all parts of America, and it are so identical that they confirm came from one source only —— Mu.

## The land of Mu lost about 12,000 years ago

According to extinction times of first man of Japan and dating times of the drill core at DOP Site 1202, and the end times of the fourth glacial period, infer mega-tsunami happened about 12,000 years ago, it is identical to sink in times with the land of Mu.

## The other relevant existed records of the land of Mu

### Map of mu

The lands of the West (Mu) from the Egyptian “*Book of the Dead*”

“*The Book of the Death*” recorded the land of Mu disappeared

In the Egptian “*The Book of the Death*” , a compound symbol or vignette described the destruction of Mu. 🔥 is the symbol for flames of fire. □ is a symbol for the Motherland. □ is an ancient symbol

for an abyss.  is a symbol for the water. Thus the vignette reads: Mu was gone down into an abyss of fire, and as she sank into the ocean and then disappeared.

## A head peeping out of a lotus flower

From “*The Book of the Death*”, the head represents an Egyptian, as shown by the head-dress. The head has arisen out of a lotus, which is shown as dead and close. In this vignette the lotus is dead Mu. A free reading of this vignette would be: I am an Egyptian of pure descent; my forefather came from the motherland Mu, the Empire of the Sun, which is now dead and gone.

## A Indian Tableau of North American

The tableau: A Quetzacoatl symbols the Deity; A Thunder Bird symbols Sacred Forces; The Killer Whale symbols the ocean waters. The Thunder Bird stands on the whale, with its claws embed in the whale’s back. The whale’s neck has been broken, and is dead.

## Depicting the Destruction of Mu

It showed the Creator desired the destruction of the Motherland of Man. The Great Forces, the executors of the Creator's commands, caused the lands to go down and the waters to cover them over. They went down into a watery abyss and were submerged.

## A commemorative monument to Mu found in Gold Gulch of Nevada

The stone resembles the squat and bent figure of a man in a posture of grief and mourning. There are some symbols in the figure as below show that means “A mouth opened, volcanic fires and vapors came forth, the land of Mu, the Empire of the Sun, sank into that abyss of fire” .

## There are existing ruins which tell the lost continent of Mu

At Uxmal in Yucatan, a ruined temple bore inscriptions commemorative of the “Lands of the West (Mu), whence we came” ; and the striking Mexican pyramid southwest of Mexico City, according to its inscriptions, was raised as a monument to the destruction of these same “Lands of the West (Mu)” .

# The lost first civilized continent in the world—Atlantis

## The source of Atlantis

2400 years ago, Plato’s “Dialogues” is the record giving an oral account of Atlantis from Greek poet Solon, among them there are two:

“Timaeus” described a brief introduction to Atlantis, a preface. The majority of the writing actually deals

with a description of the creation of the world and explanation of natural phenomena.

“Critias” provides a detailed description of the lost island and its people as well as information about the ancient Athenians.

## Atlantis

The Greek philosopher — Plato

“*Dialogues*”: Atlantis was in the Atlantic Ocean.

## The Empire of Atlantis

According to “Dialogues”, the big island of Atlantis lain in the center of the Atlantic Ocean in ancient times. The King Poseidon cut the island apart into ten to rule each on the island for five pairs of twins' son. The Empire had 1,200,000 soldiers, by means of the fight group forced to advocate Atlantis culture. Every place that believed in the god of the Sun may be the colony of Atlantis.

## The imagination of Capital Poseidonia

There are double-deck ring land and three ring canals all around in Capital Poseidonia, 9 km from the seashore. The City have Royal Palace and is it offer sacrifices to the gods or the spirits of the dead magnificent shrine of tutelary god Poseidon to present with respect in the middle of the island.

## The high civilization of Atlantis Empire

Atlantis was under the democratic system; all legal clauses were all carved on orichalcum post of the temple of Poseidon that became the law with main royal power. The people continued to have prosperity and richness, and were very gentle, wise and able, but wouldn't wallow in the millionaire. Everything is one with the morals. There was exquisite building technology and other high civilization.

## Degeneration of Atlantis Empire

For generations the Atlanteans lived simple, virtuous lives. But slowly they began to change. Greed and power began to corrupt them. They lighted the ambition to conquer the world. The army of the Empire crossed the Straits of Gibraltar and attacked Europe, having suffered defeat in Greece at last, the tendency of Empire began to go down.

## Disappearance of Atlantis

About 12,000 years ago, heavy earthquake and flood took place in succession afterwards, among a day and night, the island of Atlantis, its people and its memory were swallowed by the sea and disappeared.

## Searching having no Atlantis

According to Plato's Dialogue, Atlantis is a country on a big island in the Atlantic Ocean. Though all the time and all parts of the world find there are a lot of reports in Atlantis site, but there is not any one yet can be accepted. From ancient times to the present, there is not had any evidence indeed of discovery in the Atlantic Ocean or other areas yet. The geologists surveyed the Atlantic Ocean and pointed out the sea floor area rose in fact, not like the land one that Atlantis sank, so they denied the statement with Atlantis in the Atlantic Ocean.

## The land of Mu and Atlantis should be the same continent of lost ancient civilization

### There were 16 common grounds between Atlantis and Mu

1. It was the first great civilized empire of man.
2. The civilized continent was the Garden of Eden.
3. The people of empire made up of 10 tribes.
4. There was prosperous in the society and the products were plentiful.
5. The livelihood of the people had liberty and harmony.
6. There were canal and water channels to transport goods.
7. There had the huge temple and palace.
8. The wall of the palace hall had the shined decoration of Orichalcum.
9. The people immigrated to the world and established the colonies.
10. Colonies were in Africa, Europe, Asia and America.
11. It was ruined by volcanic outbursts and earthquakes.
12. The cataclysm happened and it sank.
13. It sank completely in almost a single day.
14. It disappeared about 12,000 years ago.
15. It sank in a big ocean.
16. The people worshiped the god of the Sun.

### The Authenticity of the land of Mu is superior to Atlantis

The Churchward's "*The lost continent of Mu*" quotes the ancient book materials: The Naacal Tablets of Indian temple, Maya's *Paris Codex*, *Cortesianus Codex*, *Dresden Codex* and *Troano Manuscript*, Indian *Epic of Lamayana*, Egyptian *Book of the Death* and *Lhasa Record*, and he investigates a lot of ancient relics in the world. On the contrary, Atlantis of Plato's "*Dialogues*" comes from the rumor only heard from the Egyptian Pontifex by Solon, the authenticity is relatively weak.

Archaeologist asserts the land of Mu and Atlantis is the same one

German Famous archaeologist Heinrich Schliemann threw himself into the archaeological undertaking in all his life in the 19th century, made Homer's epic considered to be the country with fictitious literature and art in medium or long term: Troy, Mycenae and Tiryns, reappeared its history. He, on apparently two records of the *Troano Manuscript* and the *Lhasa Record*, asserts that Atlantis was the land of Mu.

## The land of Mu and Atlantis should be the same ancient Taiwan

These 16 common grounds accord with the essential condition of history, including: time, place, personage, culture, trace, etc. that reveals the lost two continents should be the same one and the ruler is the Empire of the Sun only.

The site of The Empire of the Sun is in Taiwan, so many experts look for the lost continent of civilization that is the so-called the land of Mu or Atlantis should be the same land of ancient Taiwan.

## The interpretation of “the lost continent of Mu” is exactly the ancient Taiwan

### Mu-Land is not in the middle of the Pacific Ocean

From the perspective of marine geology, except coastal continental shelf, the marine depth in the Pacific Ocean exceeds 1,000 meters; the position of Churchward's Mu-Land in Pacific Ocean is deeper and there is never any continent existed. So, according to eyes of geosciences, Mu-Land is not in the middle of the Pacific Ocean.

### The landslide of Snow Mountains is understood as the sinking land of Mu

The big landslide of Snow Mountains in Taiwan northeastern corner collapsed that made the Capital of the Empire of the Sun in the coast area of Ilan to sink into the sea, and formed the big circular gulf that Churchward described for the sinking land of Mu. It is an evidence of the land of Mu to be ancient Taiwan.

The topographic map of northeast corner and waters of Taiwan

### The Naacal Tablet reveals the land of Mu may be Taiwan

The Nacaal Tablet in the Indian temple

### Churchward deciphered the Naacal Tablet

The  symbols the land of Mu is emerged; the lotus flower  is the floral symbol of Mu; Three pieces of foliage  gives Mu's numeral; the water  symbols the emerged land is surrounded by

water; the jumping deer  decipheres the first man on earth.

### 3 pieces of foliage shows the land of Mu may be Formosa

This vignette shows 3 pieces of foliage  above  , which symbols the land of Mu including 3 islands. The large one is Taiwan Island and the other smaller two are islands of Lyukyu and Pengfu, because the other two are found submarine ancient remnants of city or temple.

### The jumping deer was Formosan sika deer

According to the picture of jumping deer (Left), its appearance and characteristic are very similar to Formosan sika deer (right) that means the first man on earth maybe appeared in Formosa (Taiwan).

### Ancient Taiwan was the largest breeding place of jumping deer

Only growing in southeastern Asia, the Formosan sika deer is the most and largest one in the world. It was found everywhere in all the islands of Taiwan. Only one year in 1638, the record of Netherlander showed 150,000 sheets of deerskin exported from Taiwan. From ancient times till last century, the deerskin of Taiwan was the largest export in the world.

3500 years ago, mural of Akrotiri ruin, Minoan civilization in Mediterranean Sea, was found two Formosan sika deer.

### The picture of Mu was drawn by Churchward

The Biblical Flood and the geological myth in the glacial period, there were many ancient elephants walking in the forest.

### The land of Mu once was the paradise of ancient elephants

According to Indian and Maya Records : Roaming through the primeval vast forests of the land of Mu were herds of “mighty mastodons and elephants” flapping their big ears to drive off annoying insects. Many fossils of ancient elephants were excavated everywhere in Taiwan, such as: Chinese Stegodon, Indian stegodon, Taiwanese mammoth, Asiatic elephant, Norman elephant etc.

### The Fossils of ancient elephant con-firms Taiwan may be the land of Mu

The pictures are Stegodon's down molar tooth at Tainan (up) and mammoth's skull in Taiwan Channel (down). These many fossils of ancient elephant confirm Taiwan may be the land of Mu.

### Taiwan was verified to be the land of Mu

The “mega-tsunami event” at the northeast corner of Taiwan nearly correspond with the Churchward’ plot of “*The lost continent of Mu*”, including the volcano eruption, earthquake, land sink, in the Pacific Ocean and 12,000 years ago. So, it can do for the evidence of “Taiwan was exactly the land of Mu”.
